

What is cellular respiration?

Is oxygen needed for cellular respiration to occur?

What is the end result of cellular respiration?

What is the formula for cellular respiration?

What are the 3 steps to cellular respiration?

What is Glycolysis?

What is fermentation?

What is Lactic Acid Fermentation?

What is Alcoholic Fermentation?

What is the Krebs Cycle?

What is the ETC?

Define Photosynthesis

Where does photosynthesis occur?

Who is affected directly by photosynthesis?

What light do plants absorb the best?

Why do plants appear green?

What is the equation for photosynthesis?

What is the Light Dependent Reaction?

What is the Light Independent Reaction?

What is so important about these reactions?

What are factors that affect photosynthetic activity?

How does a prokaryote go through cellular respiration compared to an eukaryote?
